I. Scope

This Equipment Note gives guidance on the basic equipment requirements for a Physiotherapy Department. It is intended to be read in conjunction with Hospital Building Note No. 8 which relates to the design and planning of a physiotherapy department for a general hospital. They apply generally to teaching hospitals but additional provision will be required for schools of physiotherapy.

II. General Considerations on the Use of Equipment Notes

Equipment Note No. 1 (Equipping a hospital building) provides an introduction to the series of departmental Equipment Notes, advice on their application and guidance on the task of preparing equipment schedules for individual building projects. This departmental Equipment Note is intended to be used within the general planning framework set out in Equipment Note No. 1 and in the manner described therein.

The following method of classifying equipment, which is explained in more detail in Hospital Equipment Note No. 1, is used throughout this Note:

The term "equipment" covers all items necessary for the functioning of the hospital and includes both non-technical (e.g. furniture) and technical equipment. Short-term consumable supplies such as fuel, stationery, food, drugs and dressings are not included.

Equipment is classified into three groups:

Group I: items usually supplied and fixed by the contractor for the works.

Group II: items having a permanent or semi-permanent location and having a significant effect on space and/or structural requirements:

(*a*) those supplied by the hospital authority and fixed by the contractor for the works;

(*b*) those supplied by the hospital authority and put in position by them or on their instructions outside the general construction contract.

Group III: smaller items, usually storage items, supplied and put in position by the hospital authority.

III. Special Considerations in Respect of this Note

A physiotherapy department and an occupational therapy department together constitute the treatment side of a Department of Physical Medicine and the two should be planned together to form one unit. The equipment requirements for an occupational therapy department are dealt with in Hospital Equipment Note No. 9.

The equipment detailed in this Note is regarded as suitable to the department described in Building Note No. 8 and has been listed in room (or space) sequence conforming to the Building Note. The lists are drawn up in such a way that they are applicable to departments of varying sizes serving from 8 to 20 treatment cubicles and of varying designs within the context of the Building Note. To achieve this flexibility the method of applying the list will differ from room to room, thus:

(*a*) In the case of treatment cubicles, offices, waiting accommodation and such like, where the equipment requirements will vary with the size of the department, separate lists or columns are shown according to the number of treatment cubicles in the department;

(*b*) For recurring rooms, such as toilets, dressing cubicles and the like, the list shows the equipment for one room and will require to be multiplied by the number of such rooms included in the schedule of accommodation for a project.

The equipment listed represents average provision in the light of present practice. It is realised that the requirements may vary according to the nature of the work undertaken and the techniques employed in a particular department, and some variations may be necessary within the basic list. These should, however, be possible within the recommended cost guide figures.

Throughout the department special attention should be given to the needs of the disabled in respect of tap fittings, lavatory seats, chairs, etc.

Some fixed items of equipment (Group I) have already been mentioned (and costed) in the Building Note, but it has been thought useful to include them again in the Equipment Note which represents the results of a comprehensive review of the requirements. Reference should, however, be made to the Building Note—Part V, Engineering Services—for further information on the mechanical services and electrical installations. Structural elements, floor coverings, non-specialised heating and lighting fittings and similar items which are basic to any building are not included in the Equipment Note; neither are window blinds and window curtain tracks since the requirements may vary with local circumstances.

Throughout the schedule, for the sake of uniformity, references to towel dispensers are associated with disposal bins for paper towels. Suitable adjustments will need to be made where linen towels are to be used.

IV. Cost

Guidance on the cost of equipping accommodation for a physiotherapy department to the standard shown in this schedule is given against the list of equipment for each room. Departmental cost summaries are shown in the Appendix to the Note. In using these cost figures, the considerations referred to in Section IV of Equipment Note No. 1 should be borne in mind.

Cost figures in this schedule and in the Appendix are related only to Group II and Group III equipment. As a matter of convenience, Group I items of a specialised nature are listed in the room schedules, but these have already been taken into account in the cost allowance for construction (including engineering) in the appropriate Cost Note, in Appendix E to Hospital Building Note No. 2.

Hospital Equipment Note No. 8 — Appendix

Physiotherapy Department

DEPARTMENTAL COST SUMMARY

(To be read in conjunction with the explanatory notes in Section IV of this Equipment Note and Section IV of Hospital Equipment Note No. 1)

The room cost guide figures for basic equipment (Groups II and III), applied to standard schedules of basic accommodation for departments of various sizes, suggest departmental equipment cost totals of the following order:

Size of department as defined by the number of cubicles served			
8	12	16	20
£3,700	£4,800	£6,500	£7,900

In these totals no account is taken of the following:

(*a*) Items supplied from the Central Sterile Supply Department;

(*b*) Equipment required for basic accommodation, additional to the basic list, some guidance on which is given under the appropriate rooms;

(*c*) Equipment required in "additional accommodation", cost guides for which are shown on the appropriate pages as for basic accommodation.
